

Incinerator

Project idea

Project idea – *Incinerator*

Why

- Current one is out of date and not worth renovating
- To be compliant and eliminate risk of penalty or closing the hospital; current one is not compliant
- Needs to be build on new location due to nuisance (smell, close to houses)

What

- Detail requirements (now and future growth)
- Research compliance requirements
- Get quotations
- Contact other hospitals to learn from their solutions
- Collaborate with land plan project and identify locations
- Investigate floor / ground if suitable
- Investigate maintenance consequences of the solution and availability of spare parts

How

- Timeline: flexible, indication is december to february
- Project team
 - project leader
 - bio medical engineer
 - procurement
 - facilitary manager
- Contractor: TBD
- Stakeholders: departments that bring waste, head of facilitation
- Budget: TBD based on quotations

Risks, related things and unknowns

Land plan project
