

# Landplan

“Land-use plans locate proposed activities, infrastructure, and other physical improvements on the site”

# Landplan

- Why

Efficient use of space

Logical routing of patients

Logical routing of materials

Efficient use of existing infrastructure

Preparing for anticipated hospital growth

Preventing 're-do' of projects / infrastructure

- Risks, related things and unknowns

Some projects may need to start before the landplan is ready

Future growth of the hospital is uncertain

Possibly investment needed in 'grounding' of existing infrastructure

- What

Overview of existing infrastructure: both in use and not in use

List of necessary infrastructure

Architect / land planner

Budget estimation

Comparison with other hospitals?

Aesthetics: trees, plants, flowers

- How

Overview of existing infrastructure (1 person MT/project team with help of Mzee Evon?)

Overview of requirements made by 3-4 people (At least 2 clinical roles; eg 1 MT, 1 Dr, 1 Nurse, biomedical engineer / facility manager?)

Meeting with architect

Timeline: ASAP, goal:

- Mid Nov first meeting with architect (with overviews ready)

- Mid Dec first draft from architect

- Mid Jan definitive plan
